

# SSY Weekly Technical Update March 3<sup>rd</sup> 2026

# Cape Month Ahead

Cape March 2026 - steady but not strong

## Analysis

Cape Mar 26 has edged to another new contract high last week but has not followed through. \$30,000 is now resistance. The contract high of \$31,000 is also resistance. Support is at \$28,510.

The Bollinger Bands are neutral. The MACD is negative. The RSI is neutral. The OBV still shows distribution.

## Conclusion:

Cape Mar 26 is struggling at around \$30,000. While new highs last week cannot be denied, the action is currently poor and we advocate caution. The bull market is making heavy weather of the advance. Clearly, Cape Mar is weakening.

# Cape Cal 27

Cape Cal 27 – looking ready to move higher after ranging.

## Analysis

Cape Cal 27 is ranging from \$26,840 to \$24,998. It is trading steadily mid-range.

The Bollinger Bands are bullish. The MACD is negative. The RSI is neutral. The OBV is bullish.

## Conclusion:

**Cape Cal 27 is steady and has a bullish chart structure. There are higher lows since the start of Feb and a horizontal resistance top at \$26,840. The structure in the range is generally bullish, and the eventual break should be up and new highs. It must hold above \$25,950 to maintain its bullish structure.**
